Reminds me of an old program I loved waaaay back when called VistaPro...which allowed you to create terrain and foliage using a very basic computer system...at the time a 486? Love the ease of which you can create your scenery or control to a degree of what is generated. Powerful tool, but unsure how to integrate what is created here to be used in Unity or AGFPro.. Brawl is a game like bomberman but with better graphics.. I very short game (<2 hours), but what it lacks in length it makes up for in story. Comon, you'd pay the price of this game on a cup of coffee you'd only enjoy for 20 minutes!. It is a very entertaining game , with lots of fun events to contend with.. Nothing special, 20 years ago this might have been a good TD but these days you get so much better.... The game starts some time after the first game finished but i am not going to say more because spoilers.

The puzzles are far better and more difficult than the first game and the are a lot of new gameplay aspects to spice them up. A lot of jokes and an explosive finale. Must have if you are a fun of the 1st one.. The game started out fine, teaching you the mechanics of the gameplay but it quickly becomes very frustrating and not fun anymore.. Fun little zelda II kind of game! Sidescrolling platformer levels with an overworld map that links them. Secrets and treasures to discover, tools to collect, and bosses to fight. Music and graphics are nice too! Loved it, and the price is right.. gameplay: hard but not too punishing, just right imo

visuals: god i love them so much, if you like retro\pixel graphics, this is for you

music: probably my favorite part of this game, dark, synthy, awesome. (i knew the artist, the algorithm, before and i love his music in general, so this is no suprise)

I still have yet to finish it, so i don't really know how long it is. I'd definetly say it's worth its money.

10V10. Fun game! Takes a bit to get the feel for it and not get destroyed in seconds by pirates! Becomes repetitive after a little while but the developer is coming out with updates and is always listening to the community. Only game I've played so far that is early access that isn't bad. This is good!

What's funny is that all the bad reviews are from people who either don't have hours on the game or just don't know how to ride. **THE GAME IS ONE OF THE BEST MOTOCROSS GAMES TO DATE.** The physics, free whips and traction are cutting edge...the longer you play the game the more fun it becomes (arguably because the better you get at it). I'll admit the whips are not as 'free' as we want but what do we want? The game isn't super easy maybe like MESX previously released but we need a challenging game and this provides that... Whipping in the game does as it should, saves times over obstacles if done correctly and can look sick. Try whipping every jump and winning if you want real bubba style points...

The AI is a joke but when a full server occurs its turns into epic racing. Even though the 'net code' aka smoothness between multiplayer is garbage compared to other racing games, there could be more than we understand to making complicate multiplayer racing games. Overall great game..... jb?????????. Interesting game with good gameplay and potential.. The Trauma DLC brings some welcome variation to Alien: Isolation's Survivor Mode. The three levels are all quite different from each other and do require different approaches for optimising a time- or score-based run. I've enjoyed it thus far.

Is this DLC a "must have"? If you enjoy Survivor Mode then I think you're well serviced by Trauma. If not, then give it a miss.. \the devellers have left that game. The tutoria doesnt start as the button isnt working. dont buy it its a trap
