Need help writing this LINQ query to ignore double records I have the following LINQ query that returns a specific object from a list of objects, however it is throwing a System.IndexOutOfRangeException error. I know this is happening because of the duplicates, so I need to find a way to be able to ignore the duplicate records. Here's the query: var wm = workManagers.Where(x => x.Email == theEmail && (x.ManagerEmail == null || x.ManagerEmail != theEmail) && (x.ManagerFirstName == null || x.ManagerFirstName != theEmail) && (1678ea9f9e
